

# SUBMERSIBLE PUMPS FOR THE MUNICIPALITY OF ANNELUND, LJUNG

## WHERE:

**Ljung** is a town located in Herrljunga Municipality, Västra Götaland County, Sweden.

## WHEN:

June 2016

## THE REQUEST:

The project involved the installation of new pumps and pipes in a collection tank which has been used since the '70s for waste water. DAB supplied an FKV pump with a high efficiency vortex impeller. The new DA-V coupling system facilitated the installation, while a new sealing system with gasket on the foot hook improved the efficiency of the pump, reducing the operating costs to a minimum.
