

THE WHIRLPOOL SITE IN POPRAD (SLOVAKIA) HAS CHOSEN **e.sybox**

WHERE:

Poprad is the capital of the district with the same name, in the region of Prešov.

The city is located at the foot of the High Tatras mountain range along the border of northern Slovakia, a popular destination among winter sports enthusiasts due to its skiing trails and snowboarding tracks.

Whirlpool has a production site in the industrial district north-east of the city.

Whirlpool Slovakia was established in 1992 following the merger of two companies: Whirlpool Europe and Tratatmat Poprad.

WHEN:

June 2016

INSTALLER:

IVAR CS spol. s r.o.

THE REQUEST:

The Whirlpool plant produces about 2 million washing machines every year and is the largest washing machine manufacturing plant in Europe.

The goal of the leading company in the sector is to deliver highly energy-efficient products to the public, at the forefront of technology and innovation.

To improve water pressurisation for its complex, it likewise chose to install the most innovative system on the market: the e.sybox.
