

WHERE: The Children's Memorial Health Institute is the largest and best-equipped institute of pediatric healthcare in Poland. With a capacity of 500 beds, the center has been active for more than thirty years and employs about 2,000 doctors, operating in 17 departments and 29 clinics for specific diseases.

SALES AGENT: DAB Poland

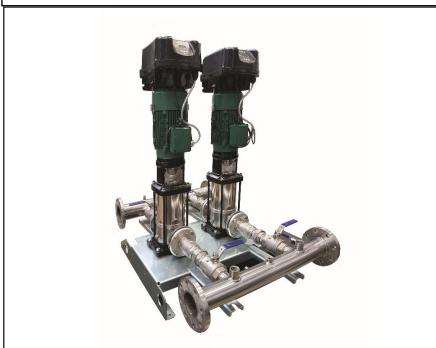

THE REQUEST

Given the particular attention due to ensure the continuous and correct functioning of the system, a constant control of the pumps is required, together with a very short intervention time in case of malfunctions.

The request is satisfied thanks to the DConnect system, which ensures continuous and remote monitoring of all the pumps in the installation, allowing the reduction of downtimes and a proper planning of the pumps' maintenance.

NKV VARIABLE SPEED BOOSTER SET WITH MCE-P

FLOW (Q): up to 140 m³/h
