Hotel Balneario Playa de Comarruga

CLIENT:

Comarruga Beach Spa Hotel

CHANNEL:

Civil and commercial applications

APPLICATIONS:

Water boosting

PRODUCTS:

3 Esybox Max; 1 x 3 Esydock Max

THE REQUEST:

DRINKING WATER BOOSTER PUMPING STATION TO ALL ROOMS AND COMMON AREAS

This spa hotel, located a few meters from the beach of Comarruga in Spain, needed the replacement of the old 5-pump drinking **water pressure booster set**.

The group made of 3 Esybox Max with Esydock was therefore chosen as the pumping system to combine ease of installation, energy saving and system reliability: the flagship product of the Esybox Line range now supplies drinking water to all 119 rooms and common areas of the hotel.

This **water pressure system** was easily installed not only thanks to its small and compact dimensions but also because the number of **pressure booster pumps** used has decreased from 5 to 3. The new installation allows a good reduction in consumption thanks to the integrated **variable frequency drive** which maintains the pressure always constant with the minimum possible expenditure of energy.

Furthermore, the native technology – wireless, Wi-Fi and bluetooth – combined with **DConnect, the DAB cloud service**, allows to easily monitor and manage the whole **booster set** remotely.
