Waste water

PRODUCTS:

32 Feka VS

THE REQUEST:

PROVIDE AND OXIGENATE WATER IN A BIG ROUNDABOUT FOUNTAIN IN MADRID

In the *barrio* of **Butarque**, an administrative neighborhood of **Madrid**, a very large fountain in a roundabout welcomes newcomers: in this installation **the necessity is to avoid as much as possible further maintenance**.

The solution? **32 DAB submersible pumps Feka VS**, providing water to individual vertical spotlights jets, helping fountain oxygenation.

Feka VS is robust and reliable; with a free passage of 50 mm greatly fits this installation needs: equipped with a die-cast **stainless steel vortex impeller**, it's perfect to prevent problems of clogging due to solids in suspension.

Such a **submersible pump** surely contributes to save time and money for eventual maintenance.
